

# MATH PREPAREDNESS

The CVCA Math Department, in keeping with our school-wide mission to partner with families for the development of Christ-like character and academic excellence, has developed a series of math resources to aid incoming students.

We recognize and respect the rich diversity of academic expectations that students experienced prior to joining CVCA. Furthermore, we believe strongly that preparation is a key contributor to success in mathematics. The resources below are designed, in conjunction with our mathematics placement exams, to help incoming students diagnose any areas where their previous mathematics experience may not have adequately prepared them for success at CVCA. The hope is that students who authentically engage with these resources will find themselves better prepared for the rigor and content of a CVCA mathematics course.

All of the Math Preparedness Resources are posted on our New Students page at [cvcaroyals.org-new-students](https://cvcaroyals.org-new-students). Please take time to review these guides, and if upon review or completion, these resources reveal the need for a more comprehensive preparation, please contact CVCA Math Department Chair Chris Harr directly at [charr@cvcaroyals.org](mailto:charr@cvcaroyals.org).
